```

Preliminary Graphs:

```
ggplot(sudoku_data_processed, aes(x = factor(clues), y = difficulty)) +
  geom_boxplot(alpha = 0.7) +
  geom_jitter(alpha = 0.2, width = 0.3) +
  labs(title = "Difficulty by Number of Clues") +
  theme_minimal()
```

```
ggplot(sudoku_data_processed, aes(x = solve_time_ms, y = difficulty)) +
  geom_point(alpha = 0.5) +
  # coord_cartesian(xlim = c(0, 25000000)) +
  labs(title = "Difficulty by Solve Time") +
  theme_minimal()
```

Difficulty by Solve Time

```
ggplot(sudoku_data_processed, aes(x = nodes_explored, y = difficulty)) +  
  geom_point(alpha = 0.5) +  
 # coord_cartesian(xlim = c(0, 2500000)) +  
  labs(title = "Difficulty by Nodes Explored") +  
  theme_minimal()
```

Difficulty by Nodes Explored
